

Solving your building automation challenges

- We perform our own controls installations
- UL-listing panel shop
- LEED®-certified professionals

For more than 25 years, Retrofit Service Company has excelled in the diagnosis and solution of building automation challenges. From office complexes to industrial facilities, we provide building control systems to monitor and manage the efficiency, comfort, and air quality of your buildings - no matter how simple or complex.

Large enough to serve you. Small enough to know you.

CHOICE AND FLEXIBILITY FOR ULTIMATE CONTROL

As a UL-listed panel shop, we build custom control panels to your building's exact specifications.

- Building automation system that works best for your business.
- Highly qualified and trained staff
- No need to lock into expensive hardware or software agreements - you get the best automation system, at the fairest price

Systems Integration

Non-proprietary, open-protocol, and interoperable building automation systems provide great flexibility and reliability. We are experts in BACnet, LonWorks, and Mod bus protocols and the following controller brands:

Solidyne | KMC | Schneider Electric | Tridium R2, AX, and N4 | Johnson Fx
Carrier Open VVT and CCN | Staefa Legacy, MS1800/2000

COMMISSIONING

We ensure your building's HVAC/R systems meet your unique Owner's Project Requirements and are operating as intended.

- Our controls technicians average 15 years of experience in the HVAC controls industry
- Highest quality installations and commissioning
